

## Environmental Policy Statement

We recognise the importance of protecting and enhancing the environment and are fully committed to ensuring that all environmental aspects, impacts and opportunities associated with our business activities are effectively managed. In order to fulfil this commitment, we operate and maintain a comprehensive Environmental Management System.

Our commitment to the environment is supported by the following objectives, which forms part of our wider Social Value contribution to the communities in which we operate:

- Prevent or minimise adverse environmental impacts from our business activities.
- Comply with all relevant environmental legislative and regulatory requirements.
- Pursue opportunities to protect and enhance places for people and biodiversity.
- Increase energy efficiency, reduce emissions and achieve carbon neutrality.
- Conserve natural resources by using materials and water efficiently.
- Minimise waste by reducing, reusing and recycling where possible.
- Promote awareness and understanding of environmental issues.
- Collaborate with others to achieve positive environmental outcomes.
- Regularly monitor and review our environmental performance.
- Continually improve and influence others to do the same.

This policy statement will be reviewed annually by our leadership team, communicated to all of our employees and made available to interested parties.
